---------- EXECUTIVE POSTURE ----------

Security Score: 96/100 (Grade: A, Posture: Excellent)
Risk Assessment: Low Risk (Score: 4)
Integrity Verification: Verified AES-256-GCM Config Manifest
Comparison Status: consistent

AI Executive Summary:
AI analysis skipped for this request....

---------- OBSERVED NETWORK TELEMETRY ----------

Packets Analyzed: 18 packets
Capture Duration: 1.0s
Observed Protocol: SMTP on Port 587
STARTTLS Support: Advertised: YES | Negotiated: YES
TLS Version: TLS1.2
Observed Cipher: ECDHE-RSA-AES256-GCM-SHA384
Key Exchange: ECDHE (Named Group: secp256r1)
Forward Secrecy: ENABLED (PFS Active)

---------- CERTIFICATE EVALUATION ----------

Certificate Present: YES
Subject (CN): mail.smtp.lab.local
Issuer: SecureMailScope Test CA
Validity Period: 2025-09-28 to 2027-09-28
Signature Algorithm: SHA256withRSA
Public Key: RSA 2048 bits
Trust Chain Status: TRUSTED / VALID
Expiration Check: VALID

==========

SecureMailScope | Security Findings & Remediation Plan

==========

---------- SECURITY FINDINGS ----------

[#1] [INFO] [TLS] TLS 1.2 in use â consider upgrading to TLS 1.3

Evidence: TLS1.2

Impact: Minimal â TLS 1.2 with strong cipher suites is secure for most deployments.

Action: Consider upgrading to TLS 1.3 for enhanced security and performance.

---------- ACTIONABLE RECOMMENDATIONS ----------

(1) Consider upgrading to TLS 1.3 for enhanced security and performance.
